

## Pete Tindal Aircraft is under new management!

Hi!

We are Steve Carr and Tom Denyer and we would like to welcome you to our web site as a friend and fellow aeromodeller.

Our products are high quality, high reliability and, we believe, good value for money. They are appropriate for any model of any size, but are ideal for the large and super-large scale models.

**Contact us:-**

**Telephone:** 0118 961 3590      **Mobile:** 07956 469639

**Web site:**      [www.petetindal.co.uk](http://www.petetindal.co.uk)

**Working hours:-**

9 am to late! Yes we mean that. If you have been busy at work all day and then remember that you need to order a part or talk though a particular problem then we should be there for you. Call us, if we are busy or in bed they leave a message on the answer phone.

As sole manufactures of all items include in the price list (with the obvious exception of film and a few odd fittings) we reserve the right to alter for the sake of improvement, without notice, any item we feel would benefit .

### NOTES

This list supersedes all others and is issued 11 July 2008.

## NOTES

Weights: Profilm 55-65 grams per sq metre  
Prolite 36 grams per sq metre

Due to lack of demand caused by the increased ARTF market our suppliers have reduced their originally vast stocks and we are unable to obtain some of the colours. We will endeavour to keep as much stock as is available

## PTA SMOKE SYSTEM

- \* The system is the most complete ever manufactured requiring only a tank to be purchased (we do not supply this as the size will vary from model to model)
- \* It is supplied with its own dedicated battery pack
- \* It is supplied pre-wired including switch and charging socket
- \* It comes complete with our own design and manufacture injectors and a smoke fluid compatible tank bung as well as head resistant tubing for connection to the engine
- \* It is fully proportional and switchable and can be linked to the throttle for automatic volume control at all engine speeds.
- \* Each component is tested by us before assembly and once again after assembly in our workshop
- \* . . . . and if that's not enough it comes with a guarantee on all parts with the exception of the battery (we don't have control of customer charging habits!)

**Cost £80**

**Additional injectors available at £2.50 each.**
